Black impulse cooler (island cooler)

Medium sized black impulse cooler ideal as island cooler. Product visibility is great - all sides are plexiglass - plus it has a high loading line compared to many other similar units. The PDC range is great for supermarkets, gas stations, convenience stores and cafeterias for e.g berries, fruit, vegetables, sandwiches or other take away.

It has stainless steel bumper bars as standard for protection and easy handling of the cooling unit. Moving it around on the solid castors is easy, so it can easily be moved to a different location in the store. Cooling is ventilated. Guided airflow makes an even distribution of the cooling effect.
